

```
/* =====  
中津くらしナビ app-shell.js
```

役割：全ページ共通の「読み込みリスト」を1箇所にまとめる。

各HTMLページはこのファイル1つを読み込むだけでOK。

★今後、新しいデータファイルを追加する時★

→ 下の SCRIPTS 配列に1行足すだけでOK (HTMLを5個も直さなくてよい)

ページごとの違いは、各HTMLの中の

```
<script>window.NAKATSU_PAGE = "shops";</script>
```

の1行だけで表現する (phase1-features.js 等がこれを見て表示を切り替える)。

読み込み方式：<script src>を動的に生成し、前のファイルの読み込み完了を

待ってから次を読み込む (現在のindex.htmlと同じ「上から順番に実行」を再現)。

```
